Infor EAM Advanced Reporting

Get the exact information you need

Today's markets are hyper-competitive and budgets are shrinking; yet you still need to find ways to increase the efficiency of your assets and maintenance operations, while lowering both capital and operating expenses. How do you gain that edge? The right information not only gives you visibility into how your assets and maintenance operations are performing, but also the ability to measure improvements against departmental and organizational goals.

That kind of deep, precise data can only be surfaced with a highly customizable, advanced asset reporting tool that's easy to use and seamlessly integrates with your existing ERP system. That's exactly what you get with Infor® EAM Advanced Reporting. You'll be able to create custom reports and modify existing reports to match your exact needs, and you can query the transactional data to detect trends and perform quantitative analysis of your maintenance operation.

Create custom reports

With Infor EAM Advanced Reporting, you get more robust access to the precise information you need to better address specific equipment and asset issues, such as preventive and corrective maintenance, regulatory and safety compliance, and labor utilization. You'll be able to place a tighter focus on specific measures and goals that promote regulatory compliance, reduce the energy usage of your assets, and help achieve sustainability initiatives.

Realize key benefits

- Dive deeper into your asset, equipment, and maintenance operations data.

- Query transactional data to discover trends.

- Measure asset and maintenance operations performance improvements against goals.

- Gain greater control over how and when detailed asset information is delivered.

- Integrate asset information with your ERP applications.

- Make better decisions and avoid costly delays with access to targeted information.

- Create the reports you need to prove regulatory compliance.

Targeted information about your assets and maintenance operations allow you to operate more efficiently and cost effectively.

With Infor EAM Advanced Reporting, you can:

- Create and distribute ad-hoc, custom, and predefined reports with an easy-to-use, web-based, drag-and-drop user interface.

- Embed asset reports directly into application structures.

- Easily build and view custom reports using common naming conventions (not cryptic codes) throughout the report structure, such as in tables, views, and data dictionaries.

- Build multipage, multiple-query reports from multiple databases.

- Include supporting documentation, company logos, related media files, and more in your reports by embedding multimedia objects directly into reports.

- Schedule reports to run at specific times and to be automatically distributed via multiple formats (such as PDF, HTML, XML, and CSV).

- Create multiple report types, such as list reports, cross-tab reports, charts, and repeater tables.

- Seamlessly access real-time asset information in your ERP applications, application security, and application mini-structures via tight integration.

- Take the pressure off IT by being able to quickly and easily implement and administer the solution—even for multiple locations worldwide.

Keep your equipment running

With Infor EAM Advanced Reporting, you'll be empowered with the right information to make better business decisions that can help increase asset reliability and enhance predictive maintenance processes—so you achieve the ultimate goal of avoiding delays that hurt your bottom line.

Powered by IBM® Cognos® ReportNet®, Infor EAM Advanced Reporting is part of the Infor EAM suite of asset management solutions. Find out more about Infor EAM Advanced Reporting by visiting www.infor.com/solutions/eam/.
